superschematic ai

ai products built by experts.

a team of ai experts · cleveland, ohio

spec sheet	
based	**cleveland, oh**
focus	**ai, on purpose**
products in flight	**02**
built for	**you**

01 what we build

agents that do the work
Agents and chatbots your customers and your team actually use.

tools you already live in
AI built into the systems and workflows you already run.

partnerships that outlast the hype
We'd rather be the people you call about the next thing.

02 kinds of projects

01
custom ai agents & chatbots
inbox triage, quotes, tickets

02
custom ai integrations
automation, decision support, workflows

03
third party ai integrations
Salesforce, HubSpot, Klaviyo

04
embedded ai experts & consultants
pairing, training, retainer

03 in flight

ezigab

under development

A headless CMS where models draft, translate and tune copy in every language you sell in.

waltour

under development

An agent that plans a walking tour around what you actually want to look at.

04 how a project goes: the timeline

1 **sketch**
An initial call to decide whether AI is the right answer for the job.

2 **schematic**
Scope, approach and a fixed price, all on one page.

3 **build**
Working software every week, with milestone acceptance criteria.

4 **handoff**
You get the code, accounts and docs. You own them outright. Retainer support is optional.

weekly working software through the build · 5-business-day review window per milestone

05 simple pricing

One fixed price for the whole project, agreed on the schematic before any build work starts. Payment follows the work:

25%	25%	30%	20%
on signing	schematic approved	build milestones accepted	at handoff

- Each milestone has written acceptance criteria and a 5-business-day review window.
- Out-of-scope changes are quoted up front and billed hourly at the shop rate card.
- No surprises: price, scope and approach are fixed on one page before building.

06 the whole crew

Michael Sharp
principal

Monica Hawes
keeps the workshop running

elite engineers
a short list, hand-picked per build

Ohio-born, Midwest-raised, globally-minded. Local service, in your time zone, from sketch to handoff.

ready to get started?

first step: a sketch call to see if AI is the answer.
